Introduction

Good Health, Great Taste

We're tired of the overpriced yoghurt with sub-par quality. We want to give customers a more rich experience without having to pay ridiculous premiums. You get what you pay for.

Why Choose Our Yogurt

Homemade Yogurt

Fresh and naturally creamy.

Nutritional Benefits

High quality protein, calcium, and live probiotics.

No Artificial Additives

Completely free from thickeners like gelatin, pectin, or modified starch.

More Active Probiotics

Contains a higher count of live, gut-friendly bacteria.

What makes it different

Taste

Rich and creamy. Sweet goodness without additives. Unflavored to cater to your choices.

Pricing

Restaurant grade yoghurt for a fraction of the price.

Ease of Portability

Small packaging makes it easy to carry whether you put it in a lunchbox or hold it in hand.

Inventory Management

Home based operation

- Low cost and low risk.
- Easier quality control.
- Flexible operating hours.

Inventory Levels Planning

- Online : Minimum order threshold of 15 containers before a batch is confirmed/produced.
- Physical : capped at 50 batches per run as the maximum on hand stock.

Inventory Assortment/Transactions

- Two separate order streams tracked independently online pre-orders (made to order, minimum 15 containers) and physical/walk in sales (pre made batch of 50).

Analyze E&O (Excess & Obsolete)

- 50 unit cap on physical stock prevents overproduction beyond what can realistically sell before expiry.

Replenishment Planning

- Production triggered by pre-orders(online) and a fixed batch of 50 for physical sales, not continuous restocking, which limits spoilage risk.

Sustainable Development Goals

Good Health and Well-being

The probiotics in yogurt support digestive health

Low in sugar and free of excessive preservatives, making it a healthier choice

Support a healthy lifestyle for the younger generation

Target Audience

Health-Conscious Consumers

This group actively seeks out probiotics and fermented foods to improve immunity and gut health.

Fitness enthusiasts

High protein options to keeping them full longer and aid in muscle recovery.

Children

Children snack frequently throughout the day at school, after sports, or before bed.
